Specific authorization for dermatopathology services is not required for any of the payers listed above. Some managed care organizations are capitated with other laboratories and are therefore closed to us at the current time, but we welcome inquiries about plans not listed above and will make every effort to contract with other plans. Please call us if you have questions about plans or insurances not listed above. We attempt to screen biopsies as they arrive so that we do not process or interpret out of network specimens sent to us accidentally.
