

Information regarding your Skin Biopsy

Today your doctor removed skin tissue that will be diagnosed by a specialized dermatopathology laboratory. Your skin specimen will be reviewed by board-certified *Dermatopathologists*, doctors who specialize in the microscopic diagnosis of skin disorders. Unlike most laboratory tests, diagnosing your skin tissue is not just another automated lab test. The lab will be providing a personalized and consultative service for your physician that includes analyzing the medical information submitted by your doctor in conjunction with observations of your skin tissue under the microscope.

Rabkin Dermatopathology Laboratory will submit the charges for your lab services to your primary and secondary insurance companies using the insurance and billing information provided by you to your physician's office. Any deductible, co-pay, or co-insurance charges related to our lab services are independent from your physician office visit.

Please contact our customer service staff toll-free at (800) 786-3054 or 412-968-9266 if you have any questions regarding your Rabkin Lab billing statement.

Thank you from your dermatopathology team at Rabkin Dermatopathology Lab
